PARTICIPANT GUIDE

Primer aliento

User manual

Observe. Decide. Understand.

A practical guide for participants in the neonatal resuscitation learning experience. Ten scenes: nine scored decisions and one final reflection.

For education only. Not a clinical-care guide or certification of competence. Videos are viewed through Google Drive.

Organized configuration R3.1 · Updated October 20, 2026

01 Access and scene sequence

02 Videos and confirmation

03 Answers and scoring

04 Reflection and summary

05 Help and limitations

This guide describes the organized version agreed in the conversation; it does not certify a particular deployed installation.

01 / Access and scene sequence

Primer aliento is a web application with two care settings. You do not need to install an app or download videos. The application has no account of its own; access to Drive depends on each video’s sharing permissions. The interface remains in Spanish: this guide explains its controls in English.

What you need

• A device with a browser and JavaScript enabled.

• An internet connection throughout the experience, including videos.

• Permission to view the Google Drive files.

• The public conference link or the website’s QR code.

Getting started

1. Scan the QR code or open the link provided by the organizers.

2. On the home screen, choose “Nivel 1 · Contexto rural” (Level 1 / rural) or “Niveles 2 a 4 · Contexto hospitalario” (Levels 2–4 / hospital).

3. Read the title and scenario for the first scene. The top bar shows your progress.

4. Work through scenes 1–9, then watch the reflection video in scene 10.

Both settings share the video for each scene, but options and explanations may differ according to the script. The selected setting does not certify any institution’s capabilities.

The ten scenes

Scene	Topic
01	Team briefing
02	The first three questions
03	The golden minute
04	Positive-pressure ventilation
05	Corrective steps: MR SOPA
06	Alternative airway
07	Compressions and ventilation
08	Access and medications

Scene	Topic
09	Post-resuscitation care
10	Final reflection (no questions)

02 / Videos and confirmation

The video appears in an embedded Google Drive viewer. Use the play button and the controls provided by that viewer to pause, adjust volume, or enter full screen. Automatic playback is not guaranteed.

Play and confirm

1. Watch the entire scene in the embedded viewer or through “Abrir en Drive” (Open in Drive).

2. Select “Ya terminé de ver la escena” (I have finished watching). On phones, this button also appears in a fixed bottom bar in scenes 1–9.

3. In the dialog, select “Sí, la vi completa” (Yes, I watched it all) to unlock answers, or “Volver al video” (Return to video).

4. Once confirmed, read the options and answer. The bottom bar disappears after confirmation.

Personal confirmation, not automatic verification. Drive does not tell this application when the video actually ends. The button does not prove you watched the full content and does not prevent skipping ahead inside the viewer.

Before answering

If you select an answer before confirming, an alert appears. That click is not counted as an attempt and does not affect your score. Opening the video in another tab does not unlock answers by itself.

Reloading a scene

“Recargar visor” (Reload viewer) reloads the scene. For an unanswered scene it resets the confirmation; follow the displayed status before answering. Each new scene requires its own viewing confirmation.

03 / Answers and scoring

After confirming, read the scenario and question. Select the action you consider appropriate from the available options. Letters may change because options are shuffled for each run.

Understanding feedback

Indicator	Meaning
Red + “Incorrecta”	The option does not match the script’s answer key. Review the expanded explanations and choose again.
Green + “Correcta”	The option matches the script’s answer key. The button to continue becomes available.
Explanations	You can expand or collapse notes about errors and context. Not every note refers exclusively to your latest selection.
“Mensaje clave”	An ochre key-message block appears after a correct answer, only where the script includes that message.

How the score works

The score counts first-attempt correct answers across the nine scored scenes. If your first choice is wrong and a later choice is correct, you can continue, but that scene is flagged for review and does not add a first-attempt point. There is no automatic pass/fail threshold.

Example: if you answer 7 scenes correctly on the first attempt and retry 2, the summary shows 7/9. Scene 10 does not change that result.

Continue

Select “Siguiente escena” (Next scene) after a correct answer. After scene 9, the button changes to “Ir a la reflexión final” (Go to final reflection).

04 / Reflection and summary

A closing scene without assessment

Scene 10 is a closing screen with the reflection video. It contains no questions, answer options, viewing confirmation, or scoring. Start the video using Drive’s controls and watch at your own pace.

• Use “Abrir en Drive” (Open in Drive) to view it in another tab if needed.

• If necessary, expand the final video’s help section to use “Recargar video final” (Reload final video).

• Select “Ver resumen del recorrido” (View summary) when you want to see your results. Navigation is not triggered automatically when the video ends.

Reviewing the notebook

The summary contains your first-attempt score, scenes to review, and a learning notebook with explanations for the nine scored scenes. Expand each section to review its notes.

Return or restart

• “Volver a la reflexión” (Return to reflection): opens the final video without adding or removing points.

• “Comenzar otro recorrido” (Start another run): starts a new experience from the home screen.

• “Volver al inicio” (Return to start): during a run, asks for confirmation before erasing current progress.

Progress and results are not saved permanently. Reloading or closing the tab loses the session. If you need to keep your result, write it down before leaving; the app has no score-export feature.

05 / Help and limitations

Common issues

Issue	What to do
Video does not load	Check your connection and select “Recargar visor” or “Recargar video final”. Compare with “Abrir en Drive”.
Drive requests access	Tell the resource owner which scene is affected. The page cannot grant access to the file.
Answers stay locked	Confirm with “Sí, la vi completa”. Scene 10 has no answers.
Cannot continue	You must choose the correct option for the current decision. Read the explanations and try again.
Result was lost	Closed or reloaded sessions cannot be recovered automatically. Start another run.

Reporting a problem

To report an issue, send the organizer a screenshot, the scene number, your device and browser, and whether “Abrir en Drive” also fails. Do not include real patient information or passwords.

Mobile use and privacy

On a phone, scroll to read the scenario and explanations. The bottom confirmation bar appears only for scored scenes awaiting confirmation. Colors are accompanied by labels; do not rely on red or green alone. This manual does not certify accessibility of Drive’s external controls.

The application creates no accounts and does not record responses on a server. However, the hosted page and Google viewers make network connections; offline use and anonymity from those services are not guaranteed.

Clinical-use warning

Clinical content requires instructor review and validation. This prototype does not replace institutional protocols, resuscitation training, or clinical judgment. Do not use it to treat patients or certify competence.
